

CHO UTF with CC314 (0.5 $\mu\text{g/ml}$ final)

CHO UTF (blue) and CHO IL-4⁺ (red)
stained with CC314 (0.5 $\mu\text{g/ml}$ final)

CHO IL-4⁺ with CC314 (0.5 $\mu\text{g/ml}$ final)

Staining patterns of untransfected (blue) and ovine IL-4 transfected (red) CHO cells with MAb CC314 (anti-bovine IL-4, Serotec MCA2372). Final antibody concentration was 0.5 $\mu\text{g/ml}$ for 5×10^5 cells. Primary antibody binding was revealed with anti-mouse IgG Alexa 488 conjugate.
